

CAMP SERVICE PATCH

The Greater Yosemite Council, BSA, has available a **Camp Service Patch** that registered youth and adults can earn. The patch can be earned by doing a total of three hours service at any of our camps or combination of our camps. The patch is designed for a unit to earn as part of a short-term campout or weekend, or at a District/Council sponsored workday. There are four camps to choose from: **Camp John Mensinger** (located 25 miles east of Strawberry - projects can only be done May through October), **Camp McConnell** (located east of Livingston - projects can be done year round), **Camp Minkalo** (located on Silver Lake off of Hwy 88 - projects can only be done May through October); and **Camp Isom** (located west of Patterson - projects can only be done in dry weather when the road is passable.) To order the Camp Service Patch, use the form below. You must contact the Scout Service Center at 209-545-6320 to obtain prior approval and tour permit for the Service Project. Some projects require materials to be on hand. The cost of the patch is \$1 each. The patch is worn in the temporary patch location, which is the right uniform pocket.
